

HiSec Profile Spider

Features & Benefits:

- Traditional 358 mesh pattern with an additional 'V' added for extra rigidity
- The tight welded mesh offers no climbing aids and mitigates attack by hand and powered tools
- Open mesh pattern provides excellent visibility
- Single panel heights can be supplied of up to a maximum of 3 metres
- Fixed to posts using an overlapping spider clip system
- Available either bolt down, in ground or on wall

Description:

Zaun's **HiSec Profile Spider** security fencing uses a popular '358' welded mesh configuration to repel thieves, trespassers and intruders. The Zaun **HiSec Profile Spider** features a 'V' beam within the mesh to add additional rigidity to the panel. The close mesh means that it is difficult to climb, and cut with anything other than power tools.

Using our 'spider' clip system to fix to our perimeter posts, **HiSec Profile Spider** can work to mitigate the risk of potential attack. The system is available up to 3 metres high in one single panel, which acts as additional security and removed breaks within the fence line.

To ensure we are able to supply a complete, single solution, pedestrian and vehicle access solutions have been carefully designed to address both aesthetical requirements along with ensuring the same security level of the mesh is maintained. The **HiSec Profile Spider** system is also ideal for integrating with CCTV, PIDs and security topping enhancements such as barb and razor coils, all of which can be supplied as part of a complete turnkey solution.

Applications:

-  Civic & Public Sector
-  Health & Emergency Services
-  High Security
-  Industrial
-  Schools & Education
-  Transport & Infrastructure
-  Utilities
