

## RDS Lite HiSec

### Features & Benefits:

- Negates the need for a Moffet or Hiab
- Rapidly deployable lightweight blocks
- A more secure temporary fence than standard hoarding
- Visually appealing and does not impact the local environment
- High visibility for use with CCTV systems
- Provides protection against external threats to any temporary site

### Description:

RDS Lite is specifically designed to be rapidly deployed and negates the need for using a Moffett or Hiab to maneuver the blocks into place unlike its high security counterpart RDS. Using recycled plastic blocks in a clever configuration to anchor to the fence posts replacing the standard 750kg concrete blocks.

RDS Lite can be used in conjunction with a range of mesh options including ArmaWeave, HiSec Super 6 or Duo6 / Duo8 depending on the level of security required but is typically supplied with HiSec 358.

This lightweight temporary fence solution is ideal for use around temporary events, construction sites or other temporary locations to protect the assets within. Designed to be easy and simple to erect and considered a higher security version to standard site temporary fences.

An economical temporary fence solution that can be used time after time to protect your temporary site.

Available to buy or to rent and can be supplied with temporary gates to match. Each system can be designed to have at any point of the perimeter.

### Applications:

-  Temporary Events
-  Transport & Infrastructure
-  Construction
-  High Security
