Features & Benefits:

- Bespoke designed gates to suit all applications
- Available with your choice of infills and colours
- Designed to suit any width and height you require
- Suitable for use with manual and electronic locks
- Access control options can be applied

Description:

Zaun's range of pedestrian gates are ideal for installation adjacent to any automated vehicular gate. Or as a pedestrian access point within a fence line. Designed to provide a safe access route for pedestrian traffic to and from site. A range of bespoke pedestrian gates, available for use with perimeter security fencing systems or sports fencing solutions. All of our Pedestrian Gates, designed with your choice of welded mesh, woven mesh, vertical bar, solid plates, sheets or timber infills to match any fence line. Our bespoke manufacturing capabilities ensures that we can design gates for almost any requirement or size in almost any RAL colour to suit the environment or branding of the site. Manufactured to British Standards (BS) from fully welded steel section with a wide range of infill options and available with a variety of security locking systems including Locinox locks, electric release, electric lock, fail safe or secure options. Each of our pedestrian gates can also be controlled using a manual lock or via access control, remote push buttons, video entry, remote free exit buttons or latching lock release / handles to name a few. Also supplied with or without closers. Each gate can also be supplied with a range of topping options to provide additional security. An additional mesh over panel can also be provided to encase the gate within the fence line.
