Notes:

1. The 'angles in fence line' define the range of angles covered by the scope. These are measured between the attack faces of two adjacent fence panels.
2. The nominal height of the Corrusec 4 fence is stated excluding the height of any toppings which must be fitted to the fence. Refer to Zaun Limited for details of compatible toppings.
3. The fencing system should be constructed and installed in accordance with the documents in the above table, using only appropriate components supplied by Zaun Limited.
4. It is important to ensure the local ground onto/into which the fence is installed offers compatible strength.
