

Benefits

- Tubular hand rail system
- Hidden laser cut tab preventing the rail from spinning
- Available in Duo or Super Rebound
- Anti tamper fixings for a secure installation
- Galvanised & polyester powder coated panels & posts
- EPDM inserts for noise reduction
- Full length clamp bars for flush playing side of pitches
- Adheres to FA guidelines

Conforms
to BS1722:
Part 14

Zaun Spectator Rails are specifically designed to improve safety for both players and spectators. When hosting any kind of spectator sport there is a requirement to keep an appropriate barrier between the crowd and the game area. Our spectator rail fencing creates a safe area around the perimeter keeping players and spectators safe during play. Manufactured to the highest quality from strong tubular section and supplied with your choice of mesh infills, making our spectator railings lightweight, robust and attractive.

Each spectator rail can be supplied with a variety of mesh infills including Duo Sports and Super Rebound. Each mesh infill is supplied with EPDM rubber inserts to insulate the panels from the noise and vibrations that occur from impacts during play, while stylish fixings hold the horizontal railings. Each mesh panel is fixed to the posts using a full length clamp bar, which keeps the mesh tight and secure to the post whilst also making it difficult for vandals to damage the panel to post fixings.

To complete the perimeter, gates can be designed to any size to allow maintenance equipment unfettered access to the sports pitch or demarcation zone. Each gate can be supplied with your choice of locking mechanism for security, which can reduce the number of any trespassers accessing the pitch without permission.

Zaun Spectator Rails can be manufactured to any pitch size and are a cost effective and strong touchline solution that is designed to last. A kickboard wooden section can also be fixed to the base of the mesh panels for hockey and field sports applications and solid panel infills are also available for advertising space.

Finish

Galvanised & polyester powder coated, after stringent cleaning & treatment to give a well adhered coating with a minimum of 60 microns. Available in a full range of RAL colours including marine coating.

Posts & Fixings

The spectator rail system features a post, EPDM rubber inserts and clamp bar configuration, providing a simple and easy method of installation. Supplied with vandal-proof security fixings and installed using either power or hand tools.

Variations

Posts are available in different lengths to accommodate panel heights and ground conditions. Additional variations are also available:

- Wall fixing or base plated

Gates:

Pedestrian gates are single leaf 1.2m wide, (or width to suit), framed in a 50mm x 50mm RHS with matching Zaun sports mesh welded inside the frame, with slide latch. Gate supplied with rubber bump stop and 2 x suitable gate posts.

Vehicle access gates are double leaf (single leaf vehicle gates available) 3.0m wide (or width to suit), framed in 50mm x 50mm RHS with matching Zaun sports welded inside the frame, with drop bolts and slide latch. Gate supplied with rubber bump stop and 2 x suitable gate posts.

Specification

Height:	1200mm
Panel Width:	2510mm
Infill Panel:	Duo 6 / Duo 8 / Rebound 6 / Rebound 8
Infill Height:	1000mm
Safety Channel:	Included
Top Edge Projection:	None (Flush on all edges) Supplied with Capping Strip
Tube Diameter:	48.3mm
Post Size:	60 x 60mm
Clamp Bar Size:	40 x 5mm
Post Centres:	2525mm
Fixing Centres:	200mm
Fixings:	Anti Tamper Security Fixings
