

Benefits

- RoSPA compliant making them ideal for Play Areas
- Hydraulic self closing mechanism
- Anti finger trap mechanism built within unit
- Provides controlled gate flow
- Easily adjustable self closing system
- Available from stock

Features

1. Self Closing Mechanism
2. No Finger Traps
3. Anti-Trap Mechanism
4. Rubber Gate Stopper
5. Galvanised or Polyester Powder Coated

Zaun's KinderGate Self Closing Gate is manufactured to comply with BS EN 1176 for playground equipment, making it free from finger traps, crush points and shear actions that could cause injury.

The KinderGate has an invisible, built in hydraulic gate closer that is completely built into the gate frame, providing a fully shielded gate closer that prevents vandalism. The aesthetic closing system both opens and closes the gate comfortably and features an adjustable closing speed to comply with RoSPA guidelines.

This self closing mechanism makes the KinderGate Self Closing Gate virtually impossible to slam shut and stops the gate from bouncing back off the post when pushed hard.

An anti-trap mechanism ensure the self closing gate and cannot swing beyond its stop point.

Available 1000mm or 1200mm high, in a Hot Dip Galvanised finish to BS EN ISO 1461 or Galvanised and Polyester Powder Coated. Supplied in yellow (RAL1021) or red (RAL3000) as standard (other colours are available upon request) to highlight the exit point on a playground.

The KinderGate is ideal for use around playground, recreation areas, parks and schools.

Specification

Heights:	1000mm / 1200mm
Opening Width:	1220mm (Clear width when fully open)
Bar Diameter:	16mm
Bar Centres:	101mm
Post Size:	70 x 70mm
Post Centres:	1396mm
Fixings:	Anti Tamper Security Fixings

Combination Gates Specification

Heights:	1000mm / 1200mm
Opening Width:	2524mm (Clear width when fully open)
Bar Diameter:	16mm
Bar Centres:	101mm
Post Size:	70 x 70mm
Post Centres:	2700mm
