

Benefits

- Stripe mesh pattern offers high visibility
- It easily blends into surroundings
- V-shaped pressings add rigidity to the fence line
- Ideal for locations not suffering from sustained abuse
- Cost-effective design with 3-metre centres
- Available either bolt down, in-ground or on wall

Features

1. Polyester Powder Coated RHS Post
2. 5mm Horizontal & 4mm Vertical Wires
3. Panel to Post Clips
4. Security Fixings

Zaun's Optima paladin style mesh fencing is designed as a contemporary and non-threatening perimeter fencing system that offers high quality and excellent value. In addition, Optima is designed as a low-cost perimeter fencing solution for a wide range of applications that are not likely to be subjected to sustained abuse, including commercial sites, schools, industrial estates, and more.

This high-quality and long service life profile mesh system visually appeals with a stripe effect mesh pattern, enabling this perimeter fence system to blend into its surroundings.

The paladin style mesh panel is constructed of 4mm vertical wires and 5mm horizontal wires. It has V pressings along the length of the panel to provide lateral rigidity, further contributing to the system's styling. As a result, Optima is ideally suited as a perimeter fencing system that is not likely to be the subject of sustained abuse.

Optima is so-called as it delivers the optimum combination of security, appearance, and value. In addition, the variable mesh pattern provides a demarcation fencing system with an attractive appearance.

Optima uses 3 metre wide panels, which reduces the cost of the system as it uses fewer posts, which in turn also makes the system quicker and easier to install.

The Optima system uses clips rather than clamp bars to fix the panels to the posts. This keeps the price down while not compromising quality.

Finish

All Zaun posts/panels/gates and painted auxiliary components (for example, clamp-bars, slide bolts etc.) benefit from a protective zinc layer and electrostatically applied polyester powder coating to BS1722 p16. Care is taken with pre-treatment to ensure sound adhesion between the zinc and paint layers. In a UK C1 environment, as defined in ISO 12944 p2, this should ensure a useful life expectancy of the fence of at least 15-20 years. Life expectancy in all environments can be extended by maintaining the fencing with regular washing. Useful life will be reduced if the fencing is damaged. Any coating damage should be repaired to reduce the effect on useful life. Enhanced painting systems such as marine coatings are also available for improved life expectancy in C2-C5M environments.

Posts & Fixings

The Optima paladin style fencing system features a post, and clip configuration, providing a simple and easy installation method. Supplied with vandal-proof security fixings and installed using either power or hand tools.

Variations

Posts are available in different lengths to accommodate panel heights and ground conditions. Additional variations are also available:

- Wall fixing, cranked posts or base plated.
- Extended posts for CCTV, lighting or physical security devices

Gates:

Pedestrian gates are single leaf 1.2m wide (or width to suit), framed in a 50mm x 50mm RHS with Zaun Optima mesh clad on the outside of the frame, with slide latch. Gate supplied with rubber bump stop and 2 x suitable gate posts.

Vehicle access gates are double leaf (single leaf vehicle gates available) 3.0m wide (or width to suit), framed in 50mm x 50mm RHS, with Zaun Optima mesh clad outside the frame drop bolts and slide latch. Gate supplied with rubber bump stop and 2 x suitable gate posts.

Specification

Height:	1750, 1950, 2350mm
Panel Width:	3005mm
Mesh Size:	Variable
Wire Diameter:	4mm Verticals 5mm Horizontals
Top Edge Projection:	Minimal Projections
Post Size:	60 x 60mm
Fixing Type:	Clips
Post Centres:	3025mm
Fixing Centres:	400mm
Fixings:	Anti Tamper Security Fixings

Applications
